Cynthia Dill <dillesqu...@aol.com>

Since you all are now incumbents, I will briefly share with you how I used by MCEA funds.

After checking with the Ethics Commission, I bought a macbook pro, and will reimburse the MCEA fund 40% of its cost.

I hired a constituent to import the electronic voter list, plus all the email addresses from the Cape Elizabeth Democrats Committee and create a few lists of email contacts, plus address labels.

I hired a constituent to take a professional digital photograph that I have on a disc and use often.

I hired another constituent to design my web site.

I hired another constituent to design my ads and create a banner for the web site and constant contact page.

I created a facebook page and got as many Cape Elizabeth Friends I could and updated regularly about the campaign.

I have a blog that is published on various sites that I send out to everyone I know.

Now that the election is over, I have a computer I can use in the legislature, a web site that can be retooled to use for constituent services, and a personal data base that is invaluable.

Oh, and I didn't knock on a single door.

We can do things differently, connect with the talent in our districts, create local jobs, and use technology to our advantage.

Cynthia
